L-Home App

Xiaolei Smart Automation

Enjoy the Exceptional Quality of Life

High-end living space with Smart Home

When you get home, lights will automatically turn on

After you issue a voice command, curtains will close automatically

Each time you wake up in the morning, beautiful music will start playing for you

.....

Based on the world's leading intelligent lighting technology, the philosophy that "Create healthy and comfortable lighting environments" is built into Xiaolei Smart Home. Smart gateways, home appliances, speakers and other smart devices are controlled by a smart home system to build the smart ways you live with multiple interaction modes. We commit ourselves to create a green, high-end and comfortable smart life for each user.

**Enriching global smart ecological links
and building a strong ecosystem**

Xiaolei · Apple Home members

Apple Official Certification

Apple TV / iWatch / MacBook / iPad / HomePod with Connected Intelligence Support

Apple Home guards home data

Ensure that home data is completely private to the user and will not be shared to the cloud, strictly protecting privacy and bringing a safe and stable whole-house smart connection solution

Multi-Device Multi-Ecology Interconnection

Link more brands through Apple Home and link different types of smart devices to create multiple scenarios

Fully automated sensing More intelligent

"Hey, Siri" wake up the whole house device or scene high handheld home, no need to do it yourself!

Make your home smart with iOS devices and Siri voice control.

iPhone

iPad

Apple Watch

Mac

AirPods

HomePod

Apple TV

Full access to Matter protocol

Ecological Communion Interconnection Infinite Possibilities

Support for interconnection and control with the global ecosystem

More open, more versatile

Xiaolei new super smart gateway, access to the smart home wireless transmission protocol matter, is committed to breaking through the ecological barrier, to realize a more inclusive whole-home interconnection.

Cross-platform and fully interconnected

Apple HomeKit/Amazon Alexa/GoogleHome/Samsung SmartThings etc. have all joined the matter! Xiaolei Smart Home system to realize interconnection and cross-brand collaboration based on the matter standard.

Full Space True Control

Using the L-Home APP, you can control all the domestic and overseas smart home devices that have joined the matter protocol, realizing the barrier-free interconnection of the whole house!

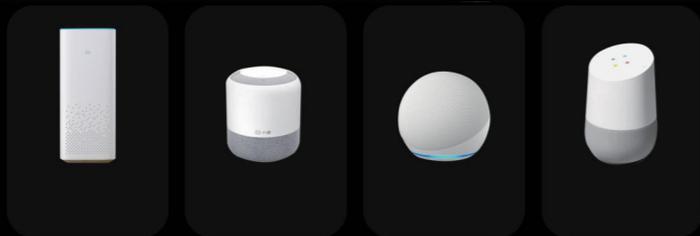

Multi-device Multi-scenario

Hassle-free linkage of multiple brands of gateways and smart devices, covering lighting, temperature control, curtain opening and closing, audio and video control, etc., and moreover, scene interconnection can be realized.

AIoT empowers and breaks through ecological boundaries

Connects with major brands of AI voice systems:
Xiaoai, Xiaodu, Alexa, Google Home

Linking various ecological platforms, intelligent control without limits:
HomeKit / SONOS / matter / Haier Smart Home / SmartThings / Midea Meiju / IFTT

Three interaction modes

APP interaction

Control your devices
from anywhere and anytime

Touch screen interaction

Touch screen offers a complete view
and places operations literally at your fingertips

Button interaction

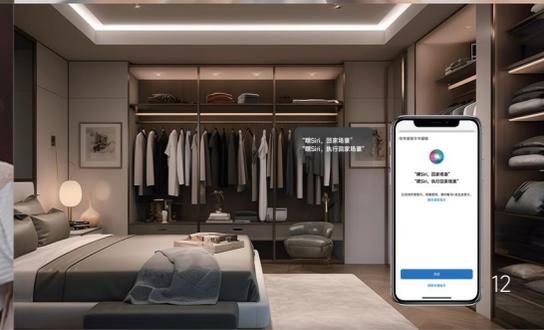

It is appropriate for people of all ages

sonos docking

Supports linking with sonos speakers in L-home,
Supports triggering scenes/automation, and playing specified songs.

Fully realize a beautiful life in smart home

Super Smart Module

CG-LINK Module

- Enabling mutual control with both domestic and international third-party brand wired systems** ABB/KNX/Philips/Schneider...
- Docking to Xiaolei Smart Automation System** Support local meeting scenes, automatic linkage
- Thousands of customized devices worry-free interconnection** support customized input of multiple commands
- OTA online upgrade** firmware upgrade at any time, ensure always new

Xiaolei get through to four major lighting protocols

Super Dimming Module 2.0

DALI LED Module

Wireless Module(DALI)

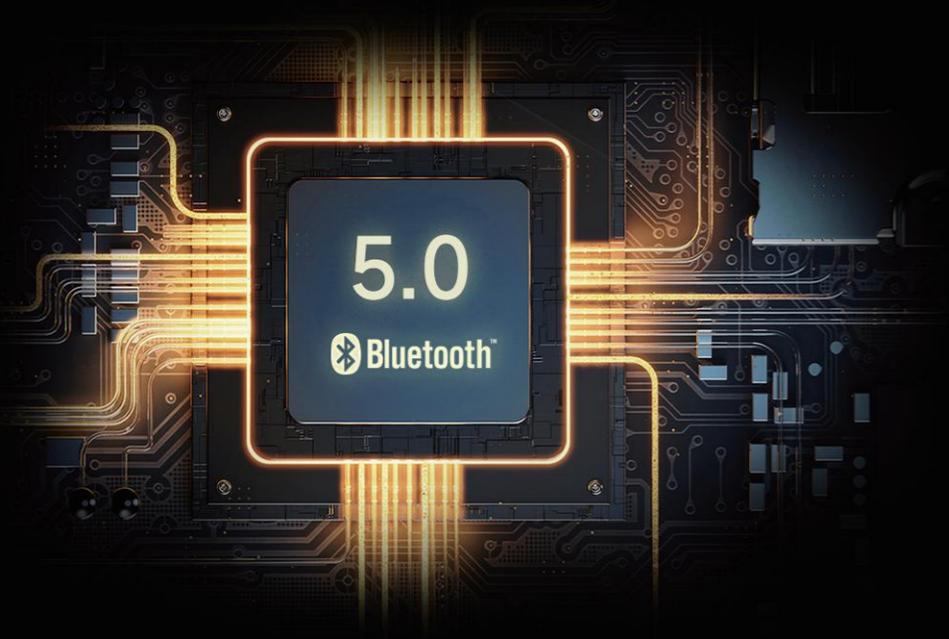

Wireless Module(Triac)

Wireless Module (DALI/0-10V/DMX, 3 in 1)

Ensure the stability in a large house

Even without the Internet, several hundred devices can still work on LAN

Support Ethernet, 2.4 GHz, 5 GHz Wi-Fi or Bluetooth 5.0 SIG Mesh connection

Super Smart Drivers

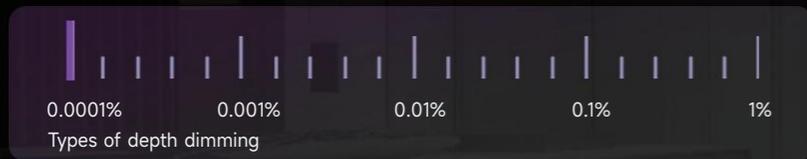

T-PWM[®]

Adopt T-PWM super depth dimming technology that it is ideally suited for use in various lights, including linear lights, downlights, spotlights, magnetic track lights, etc. Create healthy, comfortable and smart lighting environments.

T-PWM® dimming technology that achieves dimming down to 0.0001%

Super depth dimming level: 0.0001%

Testing standard: Lamp $\frac{\text{Current of maximum brightness}}{\text{Current of minimum brightness}}$ For example $\frac{300\text{mA}}{\leq 0.0003\text{mA}} \geq 0.0001\%$

*Data comes from Xiaolei laboratory

Constant Voltage LED Drivers

Soft start dimming creates a gradual and smooth transformation for enhanced visual comfort

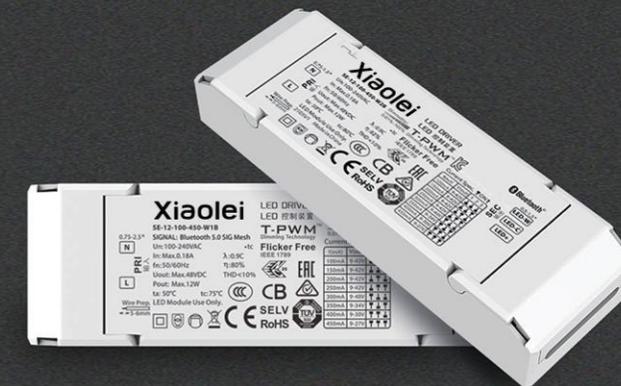

LM Series

- New technology for dimming lights down to 0.0001% lets you freely select the optimal brightness
- Flicker-free dimming, high frequency exemption level. It is kind to your eyes
- Controlled via a panel, a remote or your phone. Achieve consistency of lighting effects among multiple devices
- User-friendly design. Built-in soft start function produces a warm glow

Constant Current LED Drivers

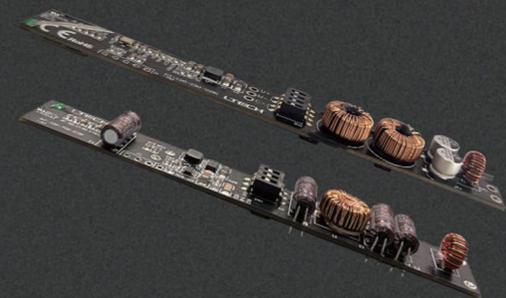

Provide exceptional lighting for you

SE Series

- High performance, great quality. Flicker-free, soft lighting
- Ultra small, thin, lightweight
- Rubycon capacitor, 5-year warranty
- Control all various types of luminaries in your home
- Simple and elegant with screwless clamshell design. A perfect combination of art and utility.

Magnetic Track Light LED Drivers

Magnetic Track Light LED Drivers
Constant Current DIM/CT

- Meet the IEEE1789 standard. Flicker-free, high frequency exemption level
- Simple installation. Quiet, no high frequency noise
- Only 15g in weight, suitable for STUCCHI standard housings
- 48V low voltage design, protection against polarity reversal
